

# Maintenance Medication Exclusion List

The following is a list of drugs that are excluded as maintenance medications. Medications which are listed here cannot be filled through the mail order pharmacy for the mail order incentive.

This list includes both formulary/preferred and non-formulary/non-preferred medications, and does not provide information regarding the specific coverage, limitations, exclusions or quotas an individual member may have. Some dosage forms and strengths of a particular drug may be considered maintenance medications, whereas others may not.

This list is sorted alphabetically by generic drug name. Generic drug names are written in lower case letters. Brand drug names (or some generic drugs with a trade name) are written in CAPITAL letters. Some drugs do not have a brand name available, in such cases the generic name is listed in the “Brand Name” column.

This list of drugs should not be used to determine pharmacy benefits, such as prescription copay/coinsurance amounts or formulary status. If you have questions about the formulary status of a medication, or your prescription benefits, please call our Member Services Department at 1-888-681-7878 (toll free). For the hearing or speech impaired: 1-800-521-4874 (toll free TTY).

The medications on this list are subject to change at any time.

**Exclusions:** Any formulation that is required to be administered by a skilled medical professional or in a medical office, drugs infused in the home or in an infusion center, drugs that may have other quantity restrictions, any state law that may prohibit the mailing of certain dosage formulation of a drug, drugs that have a high potential for waste and diversion, drugs that require temperature control upon mailing and drugs that require refrigeration.
