

Flashcards+ by Chegg for iOS

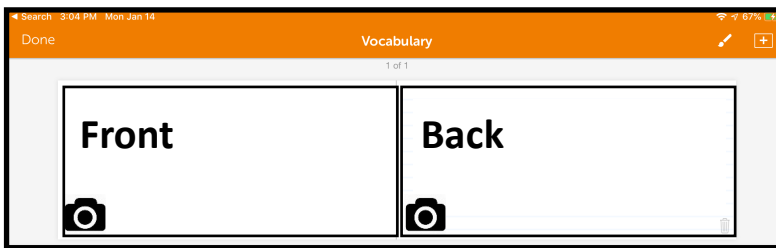

- 1) Download Flashcards+ by Chegg from the App Store
- 2) Click **Create deck** in the upper-left corner.

- 3) Add a title for the deck, then click **Create** in the upper-right corner.

- 4) Add your vocabulary term on one side of the card and the definition on the other. Click the camera icon to add a picture to the notecard.

- 5) To add another flashcard, click the + in the upper-right corner.

- 6) Click **DONE** in the upper-left corner if you are finished.

- 7) To use your flashcards, click the green icon labeled **Study**

- 8) When studying:

- Tap the card to flip it over.
- Swipe left to see the next card.
- Select the checkmark located underneath the card to mark the card as learned.
- Tap outside the flashcard to see the toolbars again.

- 9) Other adjustments that can be made from the toolbar (located underneath the notecard):

Adjust text size

Listen to your cards. Tap the speaker icon on the toolbar to set the language initially and turn speech on

Use to randomize the cards.

Tap the F/B icon in the lower-right corner to study the back of the card first rather than the front. Review cards both ways to remember better.

- 10) On the deck overview screen, tap the share icon on the toolbar to share decks . You'll have to create an account before being able to do so.
